FillTeck™

Inflatable Cushioning System

The Most Versatile Solution for High-Performance Inflatable Cushioning

FillTeck™ Inflatable Packaging System

Customize The Height and Length Of Your Cushion Size With The Touch Of A Button

Versatile and Flexible Performance Cushioning

FillTeck™ inflatable cushioning systems provide custom performance cushioning for products of any shape and size. With the touch of a button, the operator has the ability to specify the height and length of the cushioning material. The versatility of FillTeck™ systems allows you to work on-line or batch material off-line.

Customize Material Height and Length

A user-friendly control pad allows you to customize the height of FillTeck™ packaging from ½” to 4”, which reduces material usage and provides protection even in narrow spaces. Material is perforated or cut to a desired length, which eliminates waste and creates superior cushioning around your entire product.

Create On-Demand Cushioning

FillTeck™ systems produce material on-demand, making them ideal for batching applications. Batched material rolls can be distributed to individual pack stations when and where they are needed. Material can also be used for packaging on a conveyor.

Choose the Ideal Material Shape

The shape of FillTeck™ packaging can be changed at the touch of a button to provide maximum protection for your application. To wrap a product in FillTeck™ packaging, choose one of the quilted options which allow for the material to conform to irregularly shaped products. For bottom, top and side cushioning, create a protective pad by choosing an option with long cushions.

Unparalleled Strength and Performance

FillTeck™ systems utilize three different film types. FillTeck™ Standard is designed for light-duty cushioning applications. FillTeck™ Plus film provides additional strength for fragile items. FillTeck™ X film is for heavy products that require durable protection. A Sealed Air representative will help you select the right film for your application.

Superior Bottom Pad Cushioning

FillTeck™ X film – outstanding strength for heavy items.

FillTeck™ inflatable cushioning systems automatically produce cushioned pads in the length and height that you desire, enabling you to provide protection at the bottom of a carton. Guarding against shock, vibration and damage, the FillTeck™ inflatable cushioning systems ensures that your item arrives damage-free.

Specifications

| | FillTeck™ 400 System | FillTeck™ 600 System |
|--------------------|--|--|
| Electrical: | 100-120 V ~ Single Phase 16.5 A 50/60 Hz | 100-120 V ~ Single Phase 16.5 A 50/60 Hz |
| Pneumatic: | 80 PSI 10 CFM | 80 PSI 10 CFM |
| Weight: | 838 lbs. 380 kg. | 908 lbs. 412 kg. |
| Film Width: | 16" 406.4mm | 24" 609.6mm |
| Size (LWH): | 38.5" x 46.0" x 56.5" .98m x 1.17m x 1.44m | 46.0" x 46.0" x 56.5" 1.17m x 1.17m x 1.44m |
